

WHITE NOISE GENERATOR

Programmable and manual scrambled shock administration in one solid state unit

PRODUCT OVERVIEW

SDI's White Noise Generator generates adjustable amplitude, constant white noise to eliminate extraneous background sounds. The White Noise Generator is a compact, solid state unit that is small and lightweight enough to mount on a laboratory wall. It can also be installed directly into an animal testing enclosure. The White Noise Generator blocks out other stimuli that may cause distraction during behavior testing.

WHITE NOISE GENERATOR COMPONENTS

- White Noise Generator Unit
- Power Supply

Features & Benefits

- Compact, solid state unit
- Lightweight for easy mounting on a wall
- Can be directly installed in a test enclosure
